Our Cover

The blue-footed booby is one of many unique species found on the Galapagos Islands. The HD8M DXpedition team was so impressed with the work being done to preserve the rare species they encountered during their operation that they contributed a sizeable donation to the Galapagos Conservancy. Read more about it in Jim Millner's, WB2REM, article, "HD8M DXpedition to the Galapagos Islands," on page 59 of this issue. [Kate Chapman, photo]
